

Manager Grid Connection for Latin American Wind projects, Abteilung Lateinamerika, juwi Wind GmbH

Based in Wörrstadt, Germany

Starting date

As soon as possible

Referenznummer N0140

Tasks

You will be responsible for ensuring, that any grid related activities within the Wind turbine projects are realized in corporation with local colleagues in the international entities.

Your tasks will include:

- Coordinating tendering and realization of grid connection works, especially sub-stations, for projects in Latin America
- Being the interface to internal and external grid specialists
- Assignment of external advisors for grid related issues
- Evaluate German grid solutions in the light of Latin American standards

Position requirements

- Our ideal candidate holds a university degree in Electrical Engineering
- You have at least 3 years of experience in high and medium voltage works, transformer stations and grid connection
- Knowledge in the field of renewable energies would be an extra advantage
- International experience in Spanish speaking countries is a plus
- You have a high intercultural understanding and proven track record of working in cross-cultural teams
- A strong ability to structure and to work independently is essential
- A reputable appearance and flexibility is also a must
- Very good ability to speak German and English and good command of Spanish language
- Computer literate (especially MS-Office). Good knowledge in MSProject would be a plus
- The willingness to travel occasionally completes your profile
