## GERMAN MINING NETWORK

Competence in Mining & Mineral Resources

The Competence Centre for Mineral Resources of the German Chamber of Commerce and Industry (AHK) in Brazil ([www.ahkbrasilien.com.br/bergbau/](http://www.ahkbrasilien.com.br/bergbau/)) together with the Brazilian Mining Association IBRAM ([www.ibram.org.br/](http://www.ibram.org.br/)), the Mining Association of the State of Pará, SIMINERAL ([www.simineral.org.br/](http://www.simineral.org.br/)) and the Association of Commerce and Industry of Parauapebas (<http://www.acipnet.com.br/index.php>) cordially invite you to take part at our Pará mining and logistics business meeting on **November 6-8, 2017 in Parauapebas, Pará.**

The event, which is supported by the Industry Association of Pará, FIEPA, will discuss current mining activities and future mining projects, the use of modern German mining and beneficiation equipment as well as logistical issues. In this regard, the event will highlight the mining potential of Pará as well as investment opportunities and offer an overview over a wide array of new technology solutions.

According to SIMINERAL, the State of Pará will receive investments worth 23 Billion USD in the areas of mining and metallurgy until 2022. In the medium-term the state will replace Minas Gerais as Brazil's most important mining state. Members of IBRAM, SIMINERAL, the German-Brazilian Chamber of Industry and Commerce as well as representatives of mining companies from Pará and the North of Brazil, representatives of the Pará government and of research institutions will meet for two days of active discussion followed by an excursion to a mining operation located near Parauapebas (PA) on the third day.

The program will consist of presentations and discussions aiming at highlighting joint German-Brazilian relations in the spheres of mining and minerals, beneficiation and logistics, with a view of supporting business opportunities.

The event will provide a unique opportunity to network and get a deeper knowledge of the challenges, needs and opportunities in this Brazilian mining frontier. In detail, the following topics will be discussed:

- New mining and beneficiation technologies, new metallurgical concepts with a focus on energy efficiency, sustainability and health and safety issues as well as innovative logistical solutions
- The role of the Government of Pará: its development strategy for mining, metallurgy and infrastructure
- The role of research & development institutions in Pará
- Financing and services

**Register your presentation, precisely with title and name of presenter to be sent until August 30, 2017. Please use the attached form for return.**
