

Curriculum Vitae

Dr. Victoria Behrmann

Victoria Behrmann is a Member of the Board of Executive Directors of KAHL Holdings. She's been responsible for the commercial management of the companies AMANDUS KAHL and NEUHAUS NEOTEC since 2015.

After studying Business law in Lüneburg, Germany, she completed a Master in European & Comparative law in Limerick, Ireland in 2006. She started her career in the automotive industry alongside spending time at the EU Commission. In 2012, Behrmann completed a PHD in European law with the title: *Tackling Climate Change: Compulsory Licensing as an Instrument?* Despite a strong interest to continue EU-related work, a passion for the family business proved stronger, and she joined KAHL Holdings.

She is active in the Boards of the German Coffee Association (DKV) and the German Engineering Association (VDMA Nord).

The company's long-standing relationships with families and businesses in South America are particularly impressive to her, and one of Victoria's key focus areas. Her grandfather Otto first exported machinery to the continent in the 1950s -- extraction equipment for sunflower cakes to Argentina. NEUHAUS, acquired by her father Jan, installed a coffee roasting factory in Colombia. As a result, he was honoured with the golden key to the city of Ipague. Victoria is committed to strengthening the company's relationships in South America.
