

Web Conference M&A Brazil

Mergers & Acquisitions as opportunity or consequence of the crisis

In time of crisis, precaution is important but that doesn't mean it should lead to standstill. M&A transactions in Brazil recorded 1,231 deals in 2019, more than any other Latin American country.

During this webinar we will have an economic overview on Brazil, talk about trends and important aspects in Tech M&A, including the key role played by intellectual property and data privacy in this sector and some insights on system integration. Will those trends continue after the pandemic?

Date: Tuesday, 8th September 2020

Language: English

Duration: 60 min

Time: 4 p.m. CEST, 11 a.m. BRT
